

LUNENBURG PTO REQUEST FOR FUNDING

APPLICATION MUST BE TYPED

- Please type into the form, print, sign and mail/email it to the Lunenburg PTO.

APPLICANT INFORMATION

Applicant Name: Mr. Truax's Algebra 1B

Position: Math Teacher

School: Lunenburg High School

Contact Phone Number: 978-582-4115 x 173

PROJECT INFORMATION

Project Title: Ice/Hockey Service Learning Project

Amount Requested \$ 250.00

Project Start/End Dates: Feb.6th-March 16th

- Project Description: Summarize the proposed project in the space provided. Describe who is the target audience; what will happen; when and where it will occur; and how the project will be executed. NOTE: You may provide additional narrative on a separate sheet of paper, but you *must* summarize the project here. Your answer in the space below may not exceed 750 characters.

We would like to build an ice skating rink on the football field as part of a service learning project. It would benefit the community of Lunenburg. We will get donations from community businesses and residents, and during the months of February and March we will have built the ice rink and it will be of use for the town. We would be receiving help in the building and funding of the project from Mr. Truax's algebra class and other volunteers. We would like to make this project annually.

- Describe the planning process for this project. What individuals and organizations have been involved as partners and/or advisors? How would partial funding impact this project? Your answer in the space below may not exceed 500 characters.

Mr. Truax and Mr. Koziol are the leaders of this project. We are in the process of finding community based organizations to help us. Partial funding would impact this project because we could use the funds to get supplies needed to build the rink that we may not find from businesses in town. Fire, police, and water departments would be integrally involved. The rink would provide a safe skating alternative to Marshall Pond. Montachusett Sprinkler Company would also be involved.

- Explain how this project will reach and benefit the students of your school. How will you know the project is successful? Your answer in the space below may not exceed 500 characters.

This project will reach and benefit students of Lunenburg High. If there is an ice skating rink on school property then it can be used for gym class to exercise in a more enjoyable way. It can also be used by students after school for a safely monitored place to hang out. It will benefit Mr. Truax's class and everyone that builds the rink because it will require abilities and skills such as problem solving, logic, team work, responsibility, and self-management. It will also require usage of mathematical and language arts during the planning and building process. If the project is successful, the community and students of LHS will have access to an ice skating rink that can be used and enjoyed.

*Funding for this project is contingent on school committee approval following the February 1ST 2012 meeting.
